

Networkfleet Equipment

Networkfleet 3500 GPS & Diagnostics

The 3500 model delivers easy implementation in all fleet sizes, and includes a 3 year warranty at no additional cost. Like all Networkfleet hardware, it is automotive-grade quality and includes these service solutions:

Engine Diagnostics - The 3500 has patents around how it interfaces with the engine computer of a vehicle to provide diagnostic information

remotely.

Roadside Assistance - Fleet Managers can keep their drivers safe by taking advantage of our complete roadside assistance package which is included with at no additional cost.

Networkfleet Sensor Expansion Module (SEM)

Available to use with the 3500, the Sensor Expansion Module (SEM) provides fleet managers with additional vehicle diagnostic data by detecting various voltage events such as: PTO engagement/disengagement, secondary engine on/off, and door open/close. Sensor reports are available, showing the duration and location of events.

Networkfleet 4200 GPS

The Networkfleet 4200 provides superior GPS tracking for fleets. This automotive-grade hardware includes a 3 year warranty at no additional cost. It comes standard with Networkfleet's industry-exclusive roadside assistance package at no additional cost!

Networkfleet AT-1400 Asset Tracker

With the AT-1400 you can now gain access to report the location and movement for your field assets like storage facilities, trailers, generators, heavy-duty equipment or any valuable property.

Details of the AT-1400: Battery life lasts up to six years, depending on the *message configuration* which can be customized. This unit includes a *3 year warranty* and features sealed enclosures to maintain maximum functionality, even in extreme weather conditions.
