

**Monitor fuel economy
No more unnecessary fuel costs
Reduce Emissions**

Fleet Fuel Economy

Fleet Fuel Economy Management

**Do any of your vehicles need Mileage Performance Improvement?
With Networkfleet® you can identify any vehicle that may require
maintenance of drivers that need additional on-the-road training.**

It's likely that a high percentage of your fleet's total operating costs go toward fuel expenditure or unidentified maintenance issues.

- Review the miles per gallon (MPG) report to find the current fuel economy of specific fleet vehicles.
- Gain historical data to monitor MPG over a period of time.
- View a comparison of different vehicles' MPG records to identify vehicles that may exceed base thresholds.
- Reconcile reports against fuel card expenses to monitor for abuse if necessary.
- Identify any vehicles that may be idling excessively to establish policies that reduce idle time and can significantly reduce fuel costs.
- Identify speed violations and educate drivers about smart driving habits; which significantly improve MPG and fuel economy and increases driver safety.

Reduce Fuel Use Today with Networkfleet® 's Fleet Management Solution brought to you by Radio Communications of Charleston, Inc.
