

Fleet Maps

Manage All Your Vehicles Online with Networkfleet's® Fleet Map System

Simplify managing the location of your vehicles with Networkfleet's® online fleet maps, from your computer anytime. Fleet maps allow insight to your customer service delivery by providing you with the ability to reach your customers more quickly, thereby providing better customer service.

- With the usable online fleet map you can view the locations of vehicles and determine if the ignition is on or off.
- Fleet managers will have the ability to monitor vehicles in live time setting with 3-D earth imagery using satellite and hybrid maps. This service provides accurate depictions of real-time location for each vehicle's location and geographic conditions.
- By utilizing the unlimited landmarks available with Networkfleet's® map system, fleet managers will become more effective and productive. The following are a few areas of interest with the Fleet Map System:
 - Viewing the fleet map allows managers to dispatch closest vehicle to a customer, allowing for better vehicle routing, increased productivity and decreased fuel expenses all-the-while improving customer service delivery with more efficient service response.
 - By using fleet maps, managers will be able to estimate better service response times, shipment arrival times, or on-call time management more realistically based on historical data.
 - Identifies & reduces any possible vehicle misuse.

By setting Geo-fences, fleet managers have the ability to monitor when vehicles enter and/or exit a designated area. With Networkfleet solutions, you have the option to use both circular and polygonal geo-fences for more precise geographic selection. Know how many miles or how long vehicles traveled. Historical data can also be gained with geo-fencing options.
