

## **Fleet Vehicle Maintenance**

***Fleet Preventive Maintenance can stop breakdowns before they occur***

### **Schedule On-Time Service Every Time**

Eliminate timely repairs, towing time and loss productivity with Networkfleet®'s preventive maintenance management.

- By getting accurate mileage information, your fleet manager can schedule on-time preventive maintenance appointments for your vehicles, view daily odometer updates for each vehicle and reduce down-time for your mobile assets.
- By getting vehicle alerts when fleet vehicles have reached pre-determined maintenance intervals, your fleet manager can manage scheduling with ease.
- Set custom fleet maintenance alert schedules to simplify fleet management maintenance.

*Export mileage information into your existing fleet management system using Web services API. Or, if you are a government organization that leases vehicles, export mileage directly to GSA. With regular fleet preventative maintenance you can extend the life of a vehicle and increase vehicle performance and resale value.*
