

Fleet Reporting

Gain access to Customized, Detailed & Critical Mobile Asset Intelligence

By using the reporting options with Networkfleet's® online fleet management system, you or your fleet managers gain access to a various supply of intelligence. The Fleet Reporting service can provide customized reports that meet your company's specific fleet management needs, to include:

- Speed reports: Monitor this area to reduce incidents which can improve driver safety at corporate or government facilities.
- Employee work hours: Allows you to view your fleet drivers' actual schedule from your desktop, anytime from anywhere.
- Customer service response and on-site times: Review how long appointments are taking and gather critical data to gain insight on response times.
- Vehicle performance & maintenance: View vehicle performance with setting engine trouble alerts and monitor fuel use and mileage calculations.

Insight into your fleet's operating condition, productivity of your drivers, and customer service response, you can identify patterns and gain knowledge of areas of your fleet operations where improvement can be cost saving or increase productivity to your mobile asset program. By using and managing reporting functions, budgeting within your Fleet Management Dept. becomes less of a task and more of an efficient tool for you and your fleet manager. Specific, customized reporting can also be used to support customer invoicing.
